Features: Obedient, intelligent, and a natural vocation for the job.

Coat: double, straight or wavy, very full and dense. Undercoat water resistant.

Color: Any shade of gold or cream being very cute...

They are highly intelligent (one of the ten most intelligent in the world), why stand out in all sorts of tests and tasks.

Golden Retriever is a dog so cute, that licks you all the time, almost all the goldens are calm, and live from 9 to 15 years old. They are great guard dog, and is a dog that can help people that have problems, like blind people.

The hair can be brushed 3-4 times a week, and baths can be fortnightly (only from 2 months of age). The height of the Golden ranges from 56 to 61 cm. At withers height (the height of the feet to the neck), (for males) and 51 to 56 cm. (for females). The average weight of the race is 25 to 27 kg. Commensurate with the height of the animal and is a big sized dog.

The Poodles:

The Poodles are extremely intelligent, active and balanced. They are affectionate and loyal, often seek the company of people who are fondest, owners and people who are already familiar.

This dog has an exceptional intelligence and his background as a hunter. These are the main factors that arouse the greatest admiration and pride of their owners. There are four varieties of Poodle: Giant (45 to 60 cm), Medium (35 to 45cm), Small or dwarf (28-35 cm) and Toy (up to 28 cm), differing only in size).

Weight:

Toy: 3kg to 5kg.

Medium and Large: from 6kg to 28kg

Long Hair: Long, dense, abundant mane and culottes

Short hair: abundant, dense and straight;

Color: Black, White, Brown, Gray and Apricot.

Name origin: Caniche

Country of origin: France

The Poodle, also called Barbone and Caniche, is considered one of the most intelligent breeds, polite, cute. By having these characteristics and a charming appearance, is considered the most popular breeds. The name derives from the German word "pudel" which means "splashing in the water." In the past, this animal served as excellent search dog.

Around age 7, your pet enters the age of the elderly. Usually at this age, they begin to develop common diseases similar to humans such as diabetes, heart disease, and cancer hipertiriodismo. These diseases can come without warning and quickly develop so prevent these diseases is very important, talk to your vet and see what the best approach to prolong, with health, the life of your pet.

Who wants to take home and don't have many surprises with its size, the best thing to do is check the size of the parents. The number of pups in the litter is also a good indicator. Toy normally occurs in about 2 or 3 chicks; Dwarf from 4 to 6, 7-10 Medium and large 9-14 pups.
